

Understanding the top cybersecurity threats to your organization

Néstor Díaz Pre-sales Solutions Manager Inova Solutions Puerto Rico

Top Breaches in 2022

Ransomware

- Malicious software that encrypts your data.
- Often requires a very large payment
- Payments are **<u>never</u>** guaranteed to result in release of your data

Use of Stolen Credentials

- Via Brute-force attacks
- Via Malware
- Reused passwords from other sites
- Social attacks (phishing and pretexting)

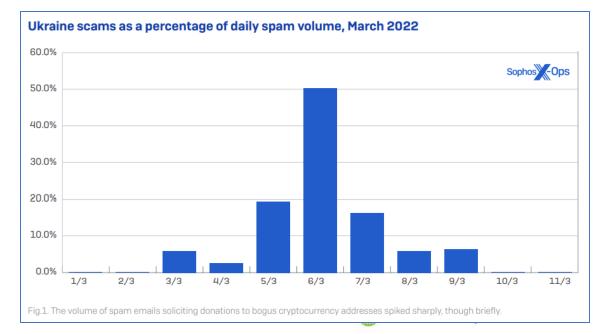

Phishing

- Emails asking for information or credentials to be used maliciously later on commonly disguised as:
 - Invoices
 - Business partners
 - Telephone calls
 - Criminal call centers
 - Social Engineering

Phishing (cont.)

- Guaranteed!
- 24/7 Service
- Expedited
- "Any features you dream"

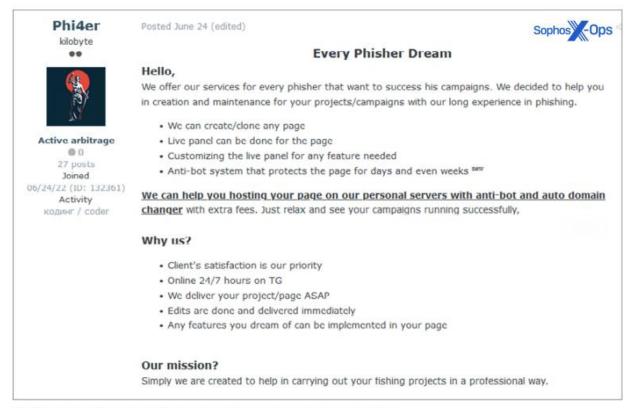

Fig. 6. A suite of phishing services comes with customer-service guarantees

- The "human version" of phishing
- Mostly Impersonating:
 - Partners
 - Bank employees
 - A superior in your own organization
- The main goals are:
 - Get banking information
 - Get a payment
 - Etc.

Misconfigurations

- Firewall Rules
- Unpatched Systems
- Antivirus without updates
- Windows / Linux OS Updates
- Mobile Device OS Updates
- Exposed to:
 - Trojans
 - Exploits

How do you know you're compromised

- Watch for anything out of the ordinary
 - Bank Statements
 - Phone Bills
 - Credit Card Statements
 - Email requests
 - Calls

• Use MFA

- Do not reuse passwords
- Use complex password generators
- Do not click email links quickly
- Keep work and personal data/devices separate

How to avoid being a target

- Change default passwords
- Use endpoint protection
- Install software updates
- Keep backups

How to avoid being a target

- Configure the security tools at your disposal:
 - Identity management
 - Data classification and data loss prevention
 - Anti Spam, Anti Phishing, Anti Malware
 - Spoofing Protection
 - Mail tips
 - Device and app management

Security Quick Wins

- Configure MFA
- Perform Access Reviews

Security Quick Wins

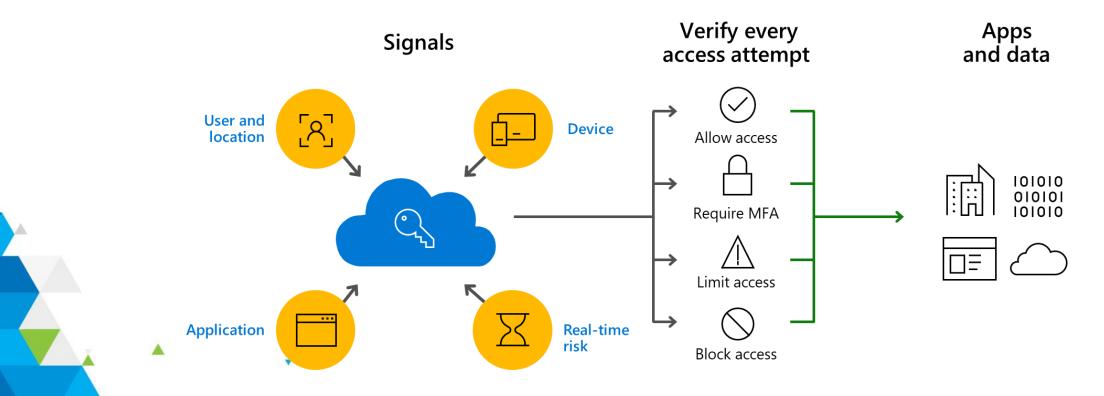

- Configure MFA
- Perform Access Reviews
- Configure Security in Microsoft 365 / Azure (Not on by default)
 - Review Secure Score
 - Defender for Office 365
 - Conditional Access Policies (location)

Conditional Access Policies

V

Security Quick Wins

- Configure MFA
- Perform Access Reviews
- Configure Security in Microsoft 365 / Azure (Not on by default)
 - Review Secure Score
 - Defender for Office 365
 - Conditional Access Policies (location)

Improvement actions > Require MFA for administrative roles

Requiring multi-factor authentication (MFA) for all administrative roles makes it harder for attackers to access accounts. Administrative roles have higher permissions than typical users.	Points achieved	History
If any of those accounts are compromised, critical devices and data is open to attack.	7.95/10	<u>8 events</u>

Manage B Share ∨ Save and close Cancel

Action plan

i Save is not available because you have read only permissions. Learn more

Update status for this improvement action. Note: some statuses are system generated and can't be updated.

Notes:

Tags:

Write a note

At a glance

Category: Identity

Protects against: Password Cracking, Account Breach, Elevation of Privilege

Product: Azure Active Directory

User impact

First, users with administrative roles need to register for MFA. After each admin is registered, your policies then determine when they're prompted for the additional authentication factors.

Users affected

All of your Microsoft 365 users with administrator roles

Show all users

Implementation

Prerequisites

✓ You have Azure Active Directory Premium P2.

Next steps

Standard implementation: If your organization doesn't have complex security requirements, you can enable security defaults to block legacy authentication and require registration and enablement of MFA for all users. Learn more about how to turn on security defaults.

Custom implementation: Set up Azure Multi-Factor Authentication policies to protect devices and data that are accessible by your users with administrative roles: In the Azure AD Conditional Access portal

1. Select + New Policy

2. Go to Assignments > Users and groups > Include > choose Select users and groups >

check Directory roles

3. At a minimum, select the following roles:

- Security administrator
- Exchange service administrator
- Global administrator
- Conditional Access administrator
- SharePoint administrator
- Helpdesk administrator
- Billing administrator
- User administrator
- Authentication administrator

4. Go to Cloud apps or actions > Cloud apps > Include > select **All cloud apps** (and don't exclude any apps)

5. Under Access controls > Grant > select **Grant access** > check **Require multi-factor**

Woodgrove Bank Annual Food Drive!!

- When: Saturday November 21st-Sunday November 22nd
- Times: 8am 6pm
- Where: Redmond location
- What to bring: Canned, dried, non-perishable food stuffs, monetary donations are also welcome
- Extra: Donations will be used to create as many "Thanksgiving in a box" as possible to hand out at the local food banks. Margarineball has donated 50 turkeys and has given us a reduced rate to purchase more.
