CIOs would choose
Microsoft

Extend LOB Systems

Improve and extend your core systems

Improve processes and user experience across your company's core systems like SAP, Oracle, and Salesforce.

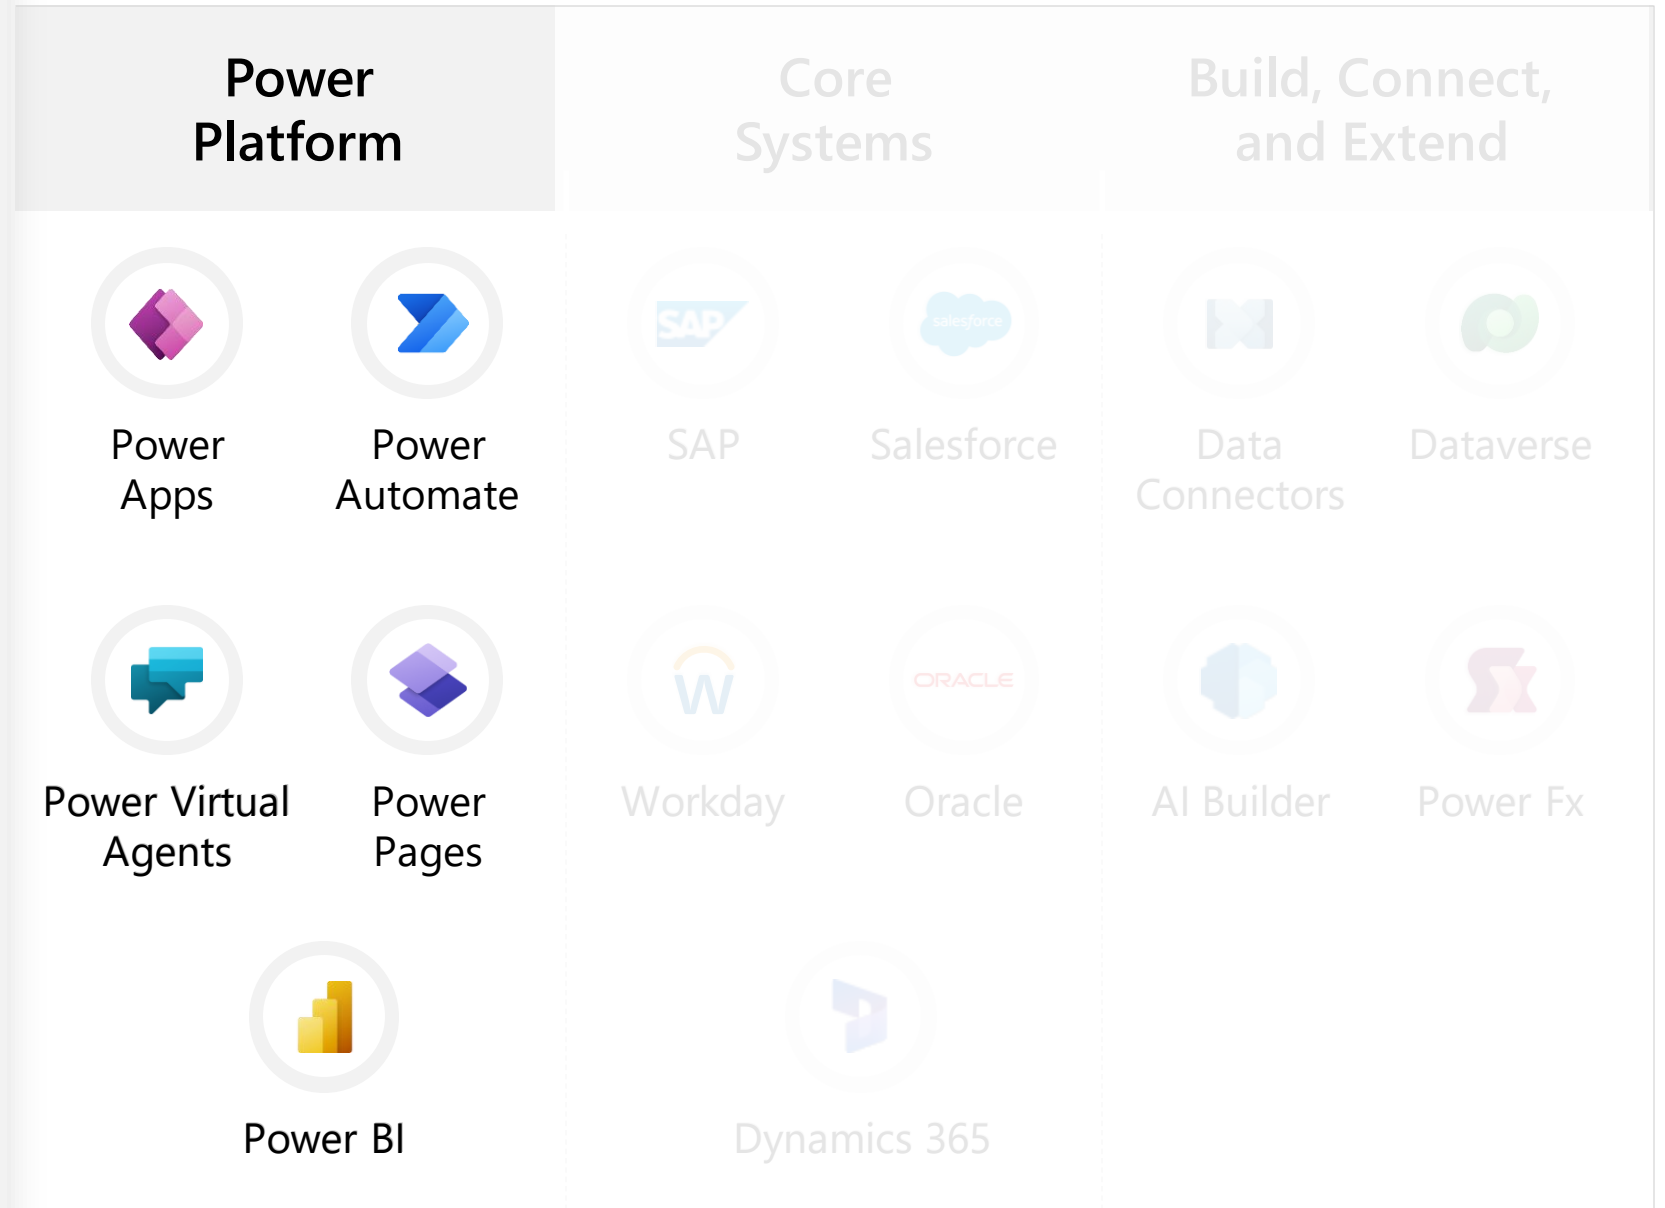

Extend your core systems with apps, flows, external websites, chatbots and dashboards to fill gaps and deliver flexibility.

Get more out of your existing investments with a modern solution that keeps the user experience seamless and extends the life of your core systems.

89% of CIOs and IT pros surveyed say low-code is effective in increasing efficiency.¹

Agility for core business systems

Extend LOB Systems with Power Platform

Build low-code apps, workflows, external websites, chatbots and dashboards to deliver simple, modern and powerful experiences across your data and processes on any device.

Automate processes that span your key line of business systems without the need for complex code using digital and robotic process automation.

Empower users wherever they work by surfacing apps and processes in the productivity tools they use every day, such as Teams and Outlook.

Safeguard mission critical data that supports your core processes with strict security and governance tools.

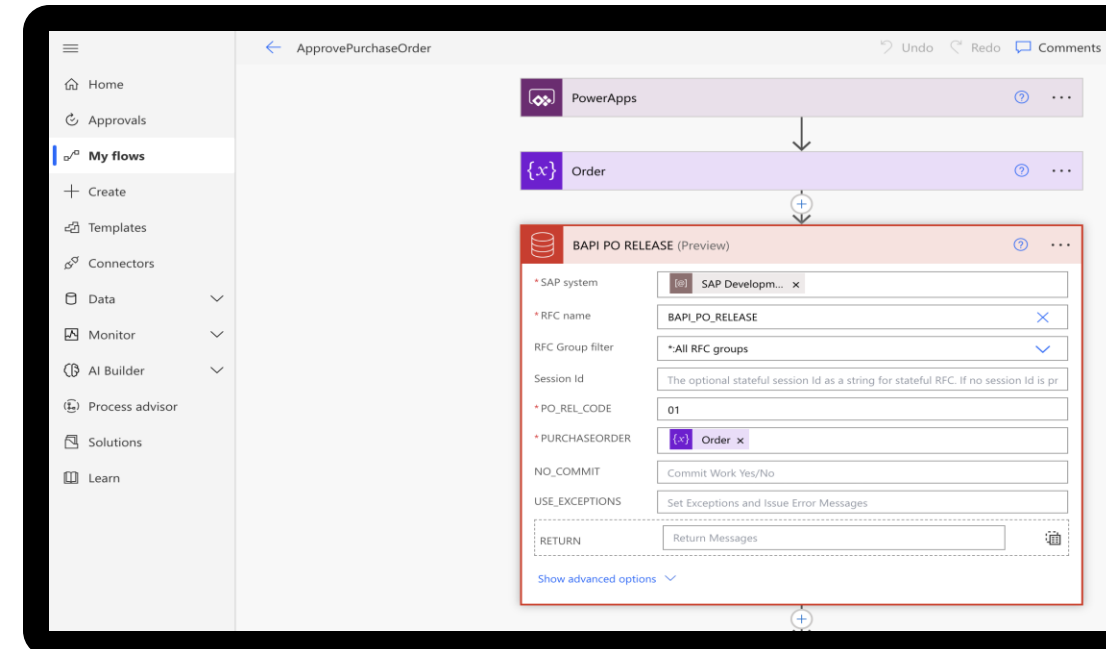

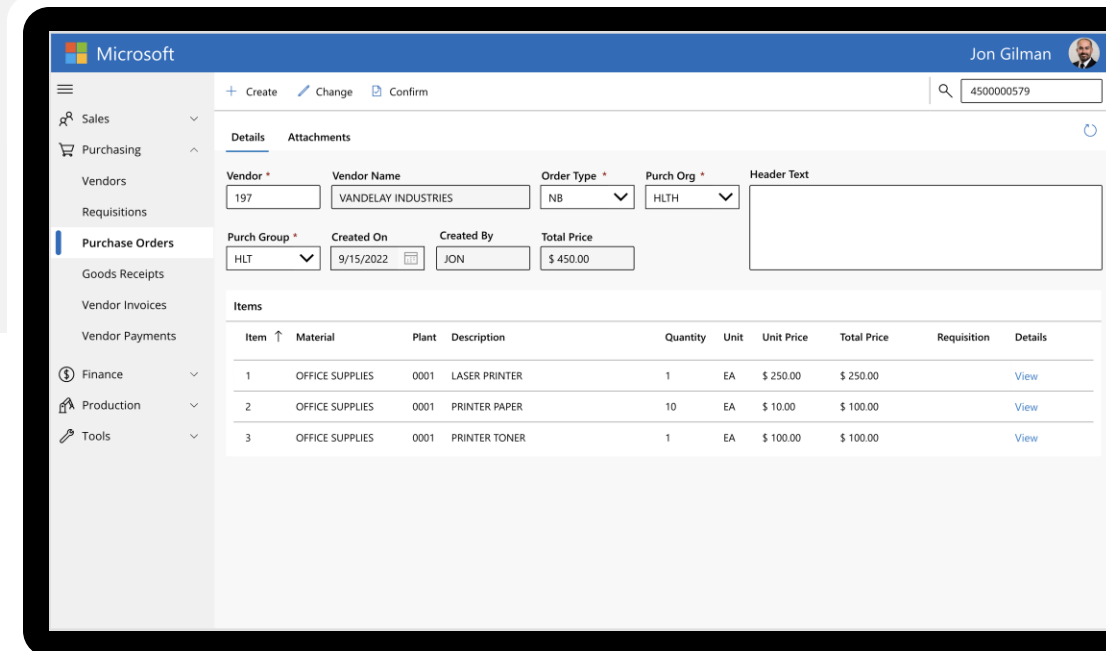

Deeper integration with your core systems out of the box

Quickly build solutions on top of your core systems data with 1000+ prebuilt connectors

Build custom connectors to consume and expose data through a secure gateway

Prebuilt templates and flows enable makes to quickly build solutions for common process

Extend your core systems with native integration to the Microsoft ecosystem including Azure and Microsoft 365

Leverage your data to enhance employee experiences

Natively integrated into Microsoft Teams, Microsoft 365, Dynamics 365

Build solutions to meet employee needs and embed them directly into their flow of work

Built-in connectivity to cloud services, content services, databases, and APIs

Robotic Process Automation is the ultimate connector, if necessary

Power Platform Copilot

Copilot **accelerates and simplifies development** and is for everyone. Imagine your solution, describe it in everyday language, and copilot will create it for you via an intuitive and intelligent low code experience.

What AI does for Power Platform

Next generation AI for developers

NEW

Copilot in Power Platform

NEW

Generative AI templates

NEW

AI assisted data integration

Next generation AI for users

NEW

AI generated analytics

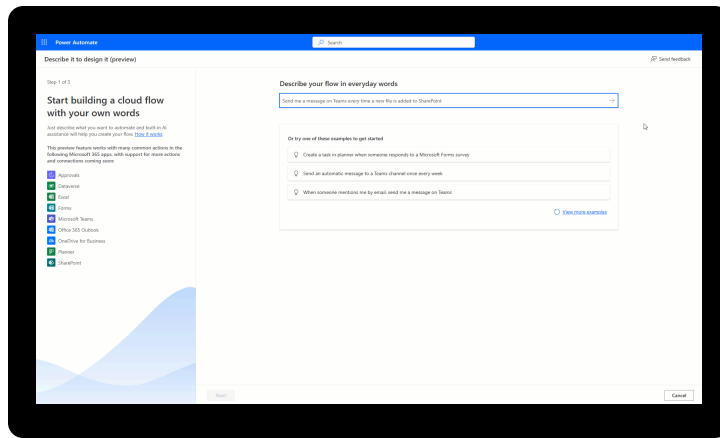

NEW

Generative answers

NEW

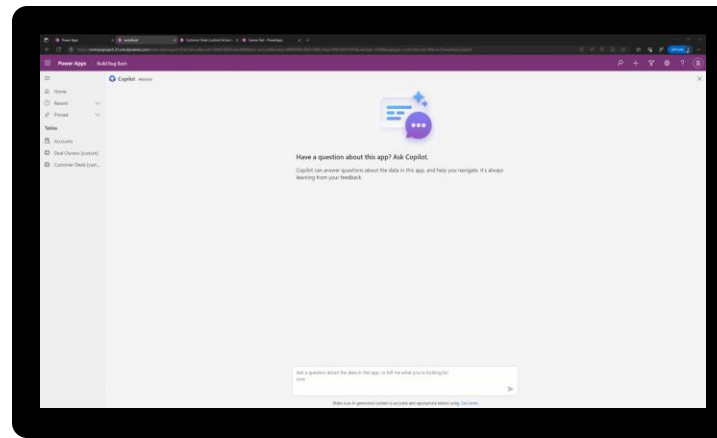

Generative actions

Next generation AI for developers

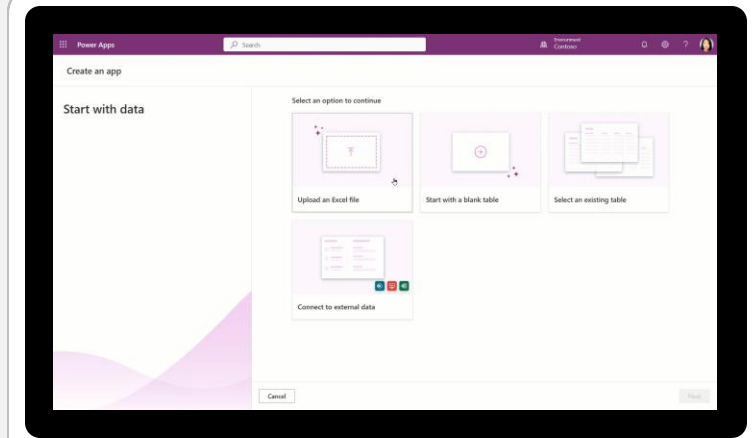

Rapidly Upskill

Leverage the in-product assistant to learn how it generated your app, bot, flow, etc.

Develop Faster

Auto-generate working websites, data reports, and more within seconds using natural language.

Streamline data integration

Drag-and-drop data sources, like an Excel sheet, into Power Apps and in a couple clicks Copilot will build your app.

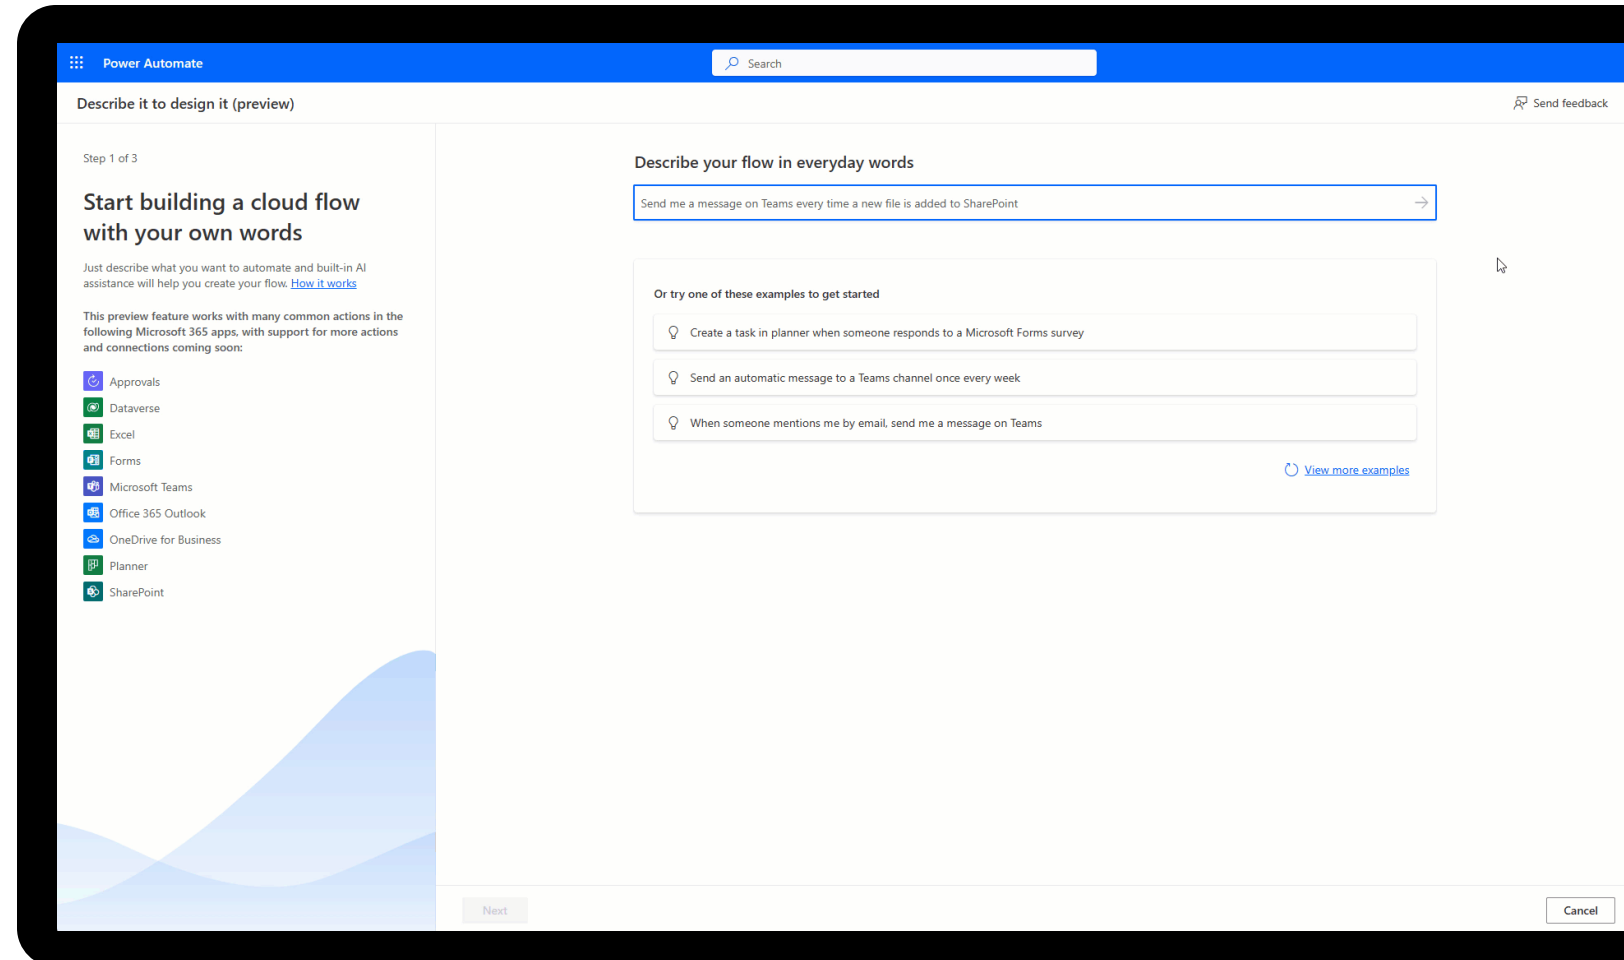

Copilot in action

Bring ideas to life with AI powered automation development

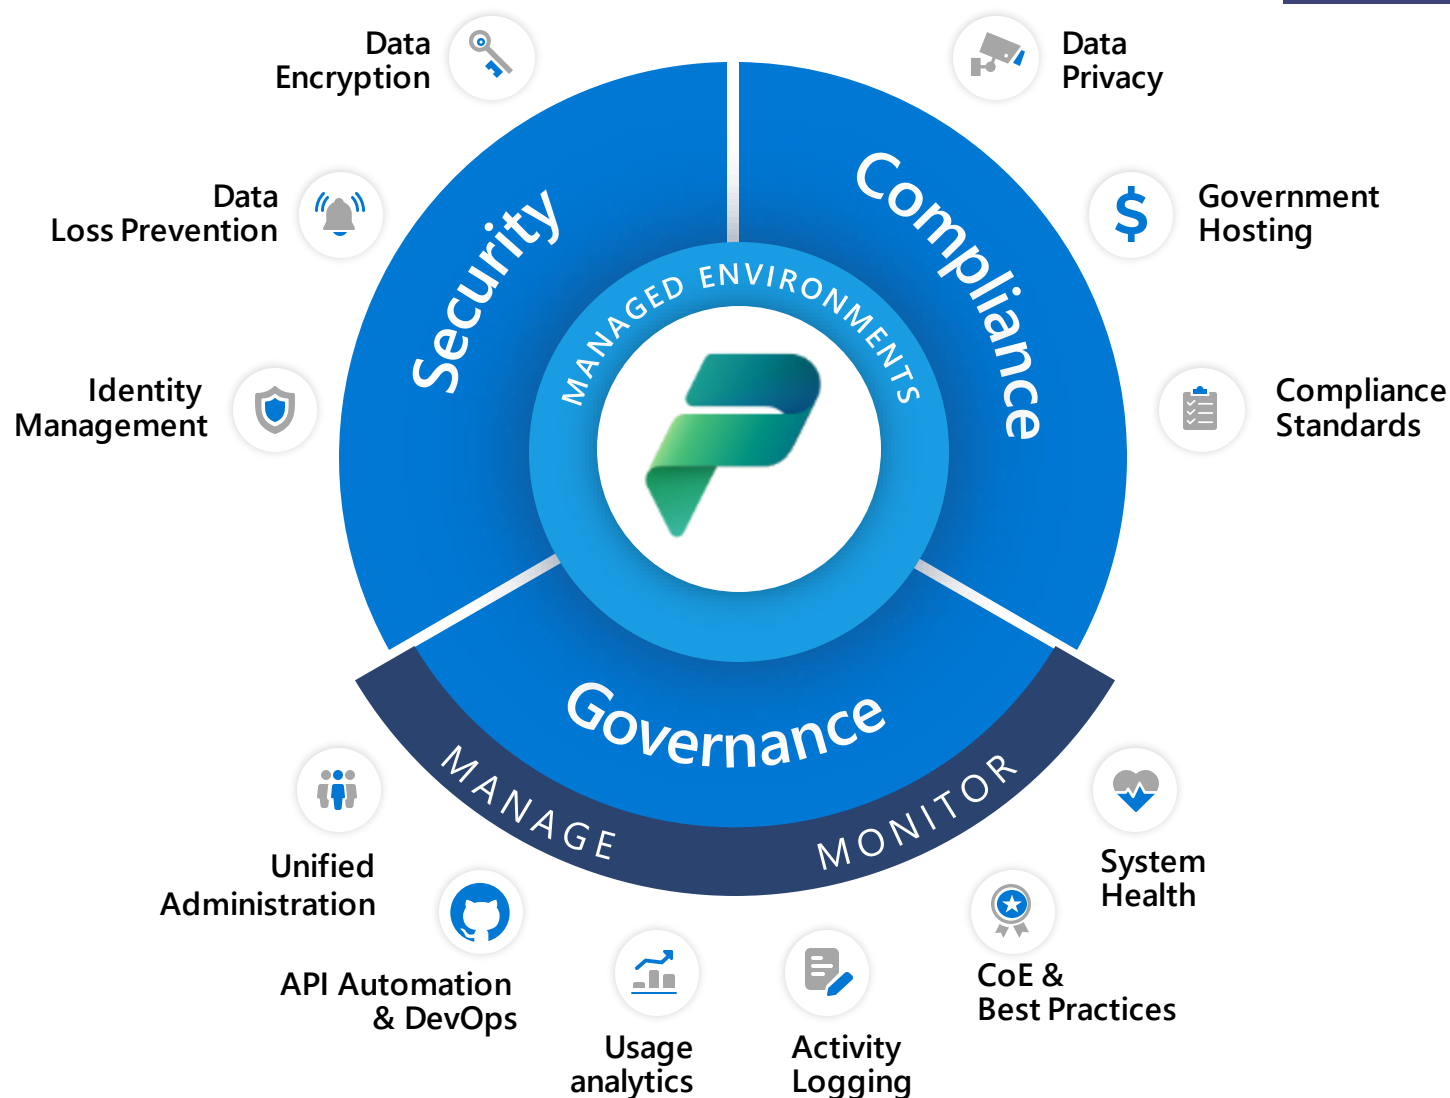

Now you can **describe what you want** to automate in a sentence, and an AI-based copilot will build your flow in seconds

This new way to create flows runs on OpenAI Codex, an AI model descendant of GPT-4 that can **translate natural language to code**, in this case, Power Automate cloud flows

Automatically generate an expression formula by providing Copilot examples of your desired output

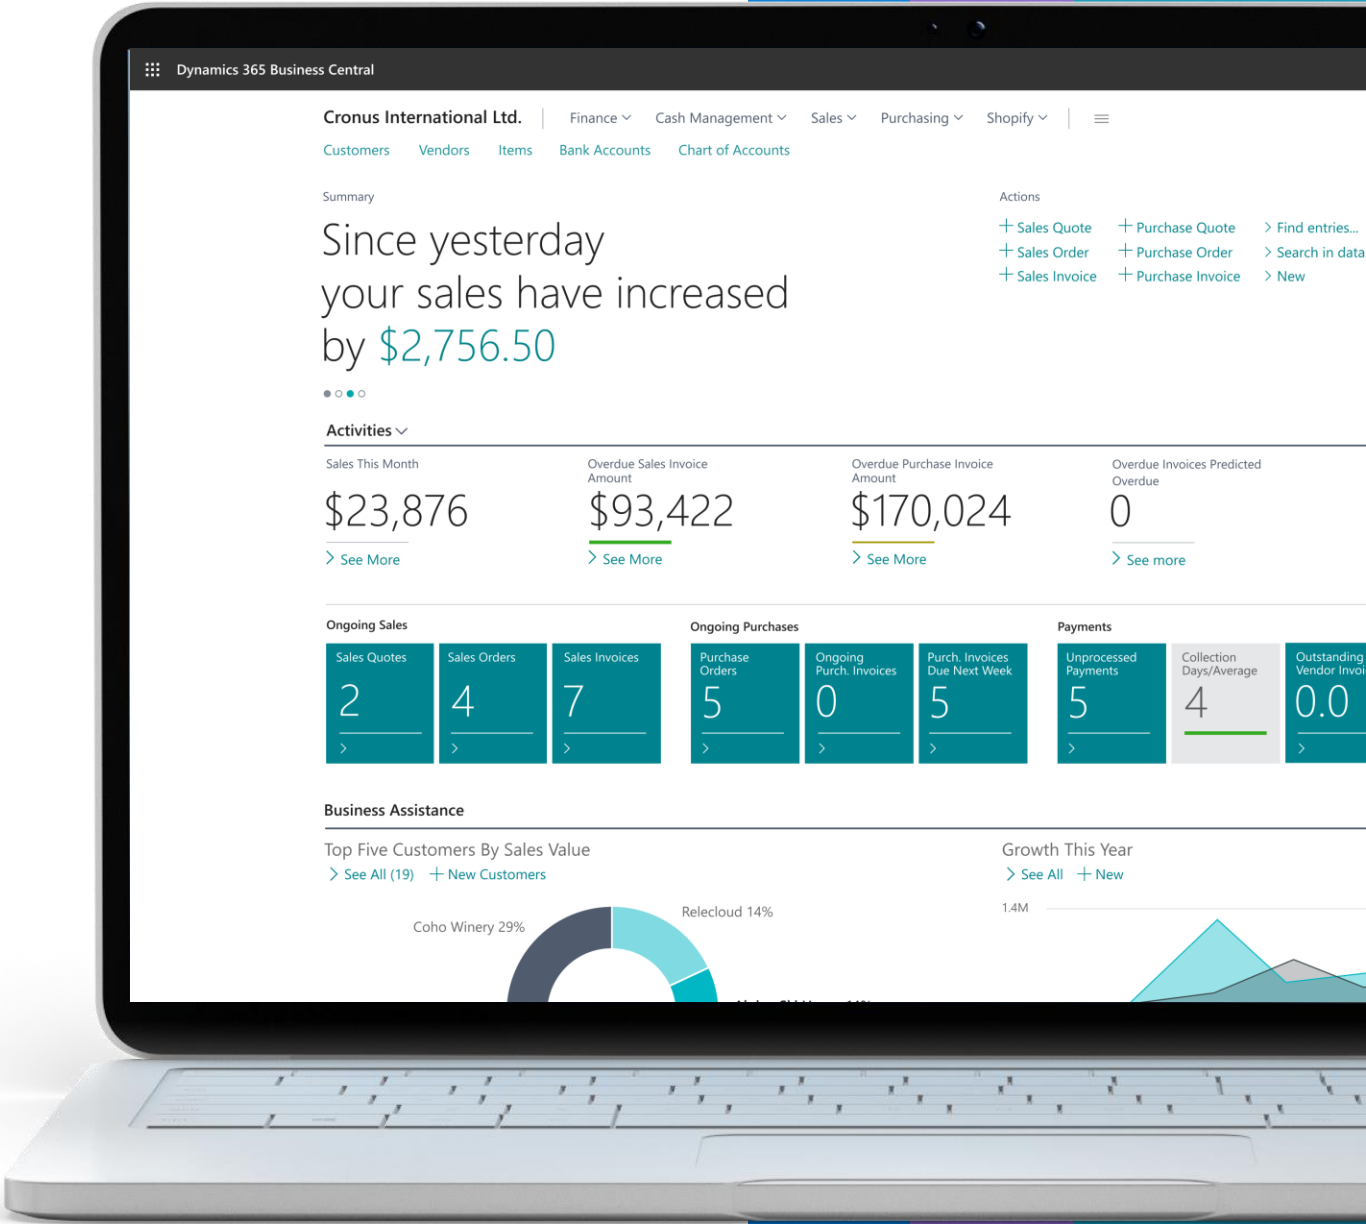

Power Platform
offers **unmatched**
governance and
security controls
at scale today
