Email, Storage or Data Migrations: Bring your data from your current provider

Azure: Virtual Machine and Resources Migrations

Introducing
INOVA CLOUD MIGRATION SERVICES

Modernize while you migrate

Helping your business in the process of moving mailboxes from on-premises servers to a Cloud environment so you can focus on what's most important.

The Inova Cloud Migration Services can support you with four types of migration:

1

Hybrid Migrations
With this migration you will be migrating some of your data to an on-premises Exchange server and some to Office 365. High complexity: migration can take weeks or months, depending on your business.

2

PST Migrations
Manually export mailboxes directly from a user's computer and import them to Office 365. This migration is high in complexity and time-consuming.

3

Application Assisted Migration
With this method we use of third-party tools, like BitTitan to help execute the migration, this is usually used for very difficult scenarios like moving from Lotus to Office 365 or other very specific scenarios High in complexity and low time consumption.

4

Standard Migrations
Easy, lightweight migrations.
