

# Discover our **CLOUD SECURITY ASSESSMENT**

## **SAFETY FIRST**

This assessment includes a comprehensive analysis of your organization's security posture. We assess vulnerabilities, identify existing threats within your Microsoft 365 infrastructure, and provide best-practice recommendations.

## **Here's our four-phase approach to set your path forward to achieve visibility across your Microsoft 365 Cloud environment:**

1

### **Planning**

This phase identifies ways to enhance your current configuration. We provide modern solutions to increase the security of your tenant and users.

2

### **Advice**

You will get an insight on configuration enhancements to strengthen your tenant's security and prevent threats. We help you define adequate policies.

3

### **Awareness**

In this phase, you get a clear picture of your current security estate. We guide you through the various licensing options for all users to ensure the highest level of security.

4

### **Preventive**

Take it a step further with zero-day advanced malware attacks. Configure Malware Filters to prevent your users from receiving software that may damage their devices.

## **TAKE THE NEXT STEP TODAY!**
